## **FEBRUARY 04 SITREP**

### **People**

CMCS(SCW) Hughes has been issued orders to relieve CMCS(SCW) Riley as MUSE Director in Jul. Senior Chief Riley has been MUSE Director for over six years and plans to retire from the Navy in Aug.

CM3(SCW) McCoy reported aboard on 9 Feb. He was sent no cost TAD to NCTC for CESE operations and maintenance support.

Construction Equipment Division (CED) began cross training six employees in preparation for implementation of their Most Efficient Organization.

EOC(SCW) Zylla and SWC(SCW) Manipon began coordinating NFELC's participation in the Oxnard Unified School District Career Fair scheduled for 9 Mar. ELC will be representing the Naval Construction Force (NCF) at this high visibility event.

### **Innovation**

The 3-M installation at Camp Shields, Okinawa was completed on 20 Feb. The 3-M program will be installed at Camp Mitchell, Spain in Mar-Apr 04 completing 3-M installation at all three deployed Seabee Mainbody Camps.

ATT was awarded a contract work order to provide 3-M technical oversight assistance at Camp Mitchell in support of their Mar-Apr 04 installation.

The Operations Department continued to develop specifics to take the NCF TOA Master Deferral Chart from concept to an executable product. When completed, this effort will enable the NCF to focus limited recapitalization resources to maximize Seabee readiness.

MUSE has put in the procurement pipeline a purchase request for two 800kW and two 1500kW new generation low emissions containerized power plants.

Work was completed on the Centralized CESE Life Extension Program Management Process and input the data into NAVFAC BMS. This process will improve efficiencies in managing the NCF's CESE repair management process and result in savings in OMN funding lines.

Worked closely with NAVSEA to improve 3-M Technical Feedback Report (TFBR) Processes for the NCF. This will help NFELC to more efficiently process a sizable backlog of TFBRs.

Dennis Rice, NFELC, Code N63 Represented the Naval Expeditionary Forces at the Joint Defense Advanced Global Positioning System Receiver (DAGR) Working Group Meetings in El Segundo, CA, February 2-3, 2004. This group will set the standards for the DAGR, the replacement for the current GPS, PSN-11.
